Bob:

The big money is spent on explosives and ammunition and even this is not so big--except that as budgets are tightened we can afford less and less.

If this leaves unanswered any questions please let us know.

MEMORANDUM FOR: Deputy Director for Support

SUBJECT : Cost of Interagency Training

25X1A

1. It has been the practice of the Office of Training to provide training for other Government agencies, including the Executive Branch, to the extent possible within staff and budgetary limitations and the expressed wish of the most concerned component -- generally the Clandestine Service. In many cases the cost of the training is limited to the salaries of the instructors for their time in preparing and conducting the training. On the other hand, [REDACTED] and more apparent within the past fiscal year, there are costs beyond salaries; that is for material used in countersabotage training, and based on requests so far in FY 72 the sum will be between \$18,000 and \$25,000. These are programs for the Secret Service, State Department, the White House, and Atomic Energy Commission. There were four such programs for 21 officers in FY 70 at a cost of \$3,100. In FY 71 we conducted six programs for 68 officers at a cost of \$10,300. The projected figure for FY 72 takes in only the commitments we have made, including two groups of 25 each from the Special Forces at Fort Bragg.

2. In the first category of training services in which only salaries are the prime costs, most of the training is at Headquarters. We regularly, for example, conduct the two-day JCS-DIA Orientation, with two such sessions a year. Last fiscal year we put on a four-day program at the request of FI/D for about 25 officers in the National Security Agency who are involved in liaison work. For the Foreign Service Institute's one-week course in Intelligence and Foreign Policy, we provide two days of coverage on the Agency's organization and functions.

25X1A Thought is being given to our renewing the "Day at CIA" for the National Interdepartmental Seminar. This program is in response to a special request of Howard Haugerud, the NIS Coordinator, and would require six presentations a year. We have given the Defensive Driving instruction at [REDACTED] for officers from the Department of State. Of note also are the briefings (about 150) that OTR's instructors give at Government installations each year.

25X1A 3. We are the recipients of much cost-free training from the Department of Defense. In FY 71, for example, the Agency sent 360 employees to DoD courses which lasted anywhere from a week to ten months. (The attachment to this memorandum is a specific breakdown of the training.) [REDACTED]

25X1A are part of four courses: Basic Operations, Midcareer, Operational Interrogation, and Clandestine Scientific and Technical Operations. OTR is not charged by [REDACTED] and just recently we responded to a request from the Division to re-affirm need for this support -- obviously as part of an exercise to justify [REDACTED] use of this service. In no way could OTR pay for this support; our only recourse would be to cut out the trips -- a course of action we would take reluctantly.

25X1A 4. We intend to curtail acceptance of requests and in fact have begun to do so, generally in coordination with the Clandestine Service. We recently notified the Department of Army that we could not accept its proposal (March 1971) to provide training for about 50 of its personnel, on an annual basis, because of staff limitations and work load restraints. We will honor the commitments we have made for this fiscal year but will take a hard look at new ones involving unusual costs, keeping in mind that even with an outlay of a maximum of \$25,000, we are probably getting much more from our compatriots than we are giving.

25X1A [REDACTED]

for **HUGH T. CUNNINGHAM**
Director of Training
